ADMISSION.

CANDIDATES for admission to the Preparatory Department must be at least twelve years of age, and for admission to the Freshman Class, fourteen.

In all cases satisfactory testimonials of good character must be given; and of students coming from another College a certificate of regular dismissal is required.

Candidates for admission to the Freshman Class must sustain an examination in the books prescribed in our Preparatory Course; or, if they come from other schools, where different authors are read, in that which shall be deemed an equivalent to this course.

I. Candidates for admission to the Freshman Class of the Classical Course, must sustain an examination in the following studies:

1. *Greek*.—Harkness' First Book; Anabasis, one book; Hadley's Greek Grammar.

2. *Latin*.—Harkness' Introductory Latin Book; Harkness' Latin Reader; Harkness' Latin Grammar; Cæsar's Commentaries, two books.

3. *Mathematics*.—Arithmetic; Loomis' Algebra to Ratio.

4. English Grammar; Geography, Ancient and Modern; Classical Chronology; Mythology.

II. Candidates for admission to the Freshman Class of the Scientific Course, must sustain an examination in the following studies:

1. *Mathematics*.—Arithmetic; Loomis' Algebra to Ratio.

2. English Grammar; Modern Geography; History of the United States; Elementary Natural Philosophy.

Candidates for advanced standing, in addition to the above studies, are examined in the studies that have been pursued by the class they propose to enter, or others equivalent to them.

Students coming from other colleges are examined, and, if found qualified, admitted to the same standing they sustained in the college from which they received their dismissal.

History.—Sacred, (Smith); Modern, (Weber).

Mathematics.—Geometry, completed.

Latin.—Latin Reader and Grammar, (Harkness); Cæsar's Commentaries.

English Language.—Course of Composition and Rhetoric.

SOPHOMORE YEAR.

FIRST TERM.

Philosophy.—Constitution of the United States.

Mathematics.—Trigonometry, (Davies).

Chemistry.—Chemistry, commenced.

ELECTIVE.

Latin, French, or German.

SECOND TERM.

Philosophy.—Political Economy.

Chemistry.—Chemistry, completed.

Anatomy and Physiology.—Physiology, (Huxley).

ELECTIVE.

Latin, French, or German.

THIRD TERM.

Mathematics.—Mensuration and Surveying; Analytical Geometry, (Loomis).

Botany.—Lessons and Manual, (Gray).

Geography.—Physical Geography, (Mitchell).

ELECTIVE.

Latin, French, or German.

JUNIOR YEAR.

FIRST TERM.

Philosophy.—Mental Philosophy, (Haven).

English Language.—English Grammar, (Fowler).

Mathematics.—Calculus, (Loomis).

ELECTIVE.

French, German, or Analytical Chemistry.

SECOND TERM.

Philosophy.—Natural Theology, (Lectures); Mental Philosophy.

Physics.—Mechanics, Hydrodynamics, and Pneumatics, (Snell's Olmsted).

ELECTIVE.

French, German, Analytical Chemistry, or Mineralogy.

THIRD TERM.

Philosophy.—Moral Philosophy, (Wayland).

Physics.—Acoustics and Optics, (Snell's Olmsted).

Zoology.—Manual of Zoology, (Tenny).

ELECTIVE.

French, German, Analytical Chemistry, or Mineralogy.

SENIOR YEAR.

FIRST TERM.

Law.—History of the English Constitution.

Philosophy.—Logic, (Whately); Butler's Analogy.

Geology.—Manual of Geology, commenced, (Dana).

SECOND TERM.

Philosophy.—Rhetoric, (Whately).

Mathematics.—Astronomy, (Loomis); Civil Engineering.

Geology.—Manual of Geology, completed.

THIRD TERM.

Law.—International Law, (Woolsey.)

Philosophy.—History of Philosophy, (Lectures;) Evidences of Christianity, (Hopkins.)

Mathematics.—Civil Engineering.

Chemistry.—Agricultural Chemistry.

PREPARATORY DEPARTMENT.

It is the especial design of this Department to prepare students to enter one of the University Courses. It is open, however, to others qualified to enter its classes.

During the year, classes are formed in the following branches :

FIRST TERM.

Greek.—Harkness' First Book.

Latin.—Introductory Latin Book, (Harkness).

Mathematics.—Arithmetic, (Stoddard).

Natural Science.—Elementary Natural Philosophy, (Peck's Ganot).

Geography.—Ancient Geography, (Fiske).

English.—Reading and Defining ; English Grammar, (Bullion).

SECOND TERM.

Greek.—Harkness' First Book.

Latin.—Introductory Latin Book, continued ; Latin Reader and Latin Grammar.

Mathematics.—Arithmetic ; Algebra, commenced, (Loomis).

Chronology.—Classical Chronology.

English.—English Grammar ; Modern Geography, (Guyot).

THIRD TERM.

Greek.—Xenophon's Anabasis, (Boise's First Three Books).

Latin.—Latin Reader and Grammar, (Harkness); Cæsar's Commentaries.

Mathematics.—Arithmetic ; Algebra, continued.

Natural Science.—Natural History, (Hooker).

Antiquities.—Grecian and Roman Mythology.

English.—English Grammar ; Modern Geography ; History of the United States.

GENERAL INFORMATION.

THEOLOGICAL DEPARTMENT.

THE Board of Trustees, at the session in 1866, established two chairs in the Theological Department of the University. Of these, one (the Chrisman-Professorship of Biblical Theology and Literature) has been filled, and instruction is now given in the studies of the first year. The endowment of the second chair (the Morris-Professorship of Systematic and Pastoral Theology) has been fully secured; and the endowment of a third chair nearly completed. It is expected that a full Faculty will be appointed at an early day, a complete course of study prescribed, and the usual classes of a Theological Seminary organized.

HIGHER CHEMISTRY.

A DEPARTMENT of Analytical Chemistry has been opened, in which students are supplied with the necessary apparatus and chemicals for completing a full course of Qualitative and Quantitative Analysis. The student performs all operations under the immediate supervision of the Professor, and keeps full notes of the work done. After the revision of these notes, the student puts them in permanent form, and at the close of the course submits them for final inspection. All the chemical formulæ and equations are written in chemical symbols, and particular attention is paid to working out all the reactions that take place during the operations. The design of the Department is to enable the student to acquire a practical knowledge of the laws and operations of chemistry, and skill in chemical manipulations. The end sought is not so much the study of Analytical Chemistry as the study of *general* Chemistry analytically. A moderate fee is charged for instruction, and chemicals are furnished at the usual prices.

Text-books and Manuals of reference are: Fresenius' Qualitative Analysis; Douglass' Tables; Brande and Taylor's Chemistry; Conington's Hand-Book of Chemical Analysis; Miller's Chemistry;

Watt's Chemical Dictionary; Fresenius' Quantitative Analysis; Elderhorst on the Blowpipe; Muspratt and Plattner's Blowpipe Analysis.

MODERN LANGUAGES.

IN view of enabling the student to possess himself of the keys to the rich treasures of Continental Science and Literature, and of responding to the growing importance—especially in the West—of a knowledge of German in all of the professions, provision is made for electing German or French throughout the Sophomore and Junior years.

Special effort is made to render the knowledge of these languages living and practical. As the student advances he is trained not merely in translating the printed language, but also in understanding it when spoken, and in speaking it himself.

ELECTIVE STUDIES.

ALL the studies of the Freshman Year are required. In the Sophomore, Junior, and Senior Years certain studies are marked *Elective*; of which each student must take one, in addition to the required studies of the term.

SURVEYING AND ENGINEERING.

SPECIAL attention is given to Practical Surveying and Engineering. For this purpose the Institution is furnished with the best instruments now in use.

MUSIC.

INSTRUCTION is given to such students as desire it in music and vocal culture.

LECTURES.

I. BY THE PRESIDENT:

During the First Term, to the Freshman Class, on College Life and Studies.

During the Second Term, to the Junior Class, on Natural Theology.

During the Third Term, to the Senior Class, on the History of Philosophy.

II. In the Classical Department occasional lectures are given on the authors read; and, during the Senior Year, a course of lectures on Philology and Ancient Literature.

III. In the Departments of Mathematics and Mechanical Philosophy, a course of Lectures is given during the first term of the Senior Year on the Philosophy of Mathematics and the History of Physics.

IV. In the Departments of Chemistry and Natural History, the subjects taught are illustrated by lectures.

V. The Professor of Biblical Theology and Literature will deliver, during the ensuing year, a course of lectures on the genuineness, authenticity, and literature of the Books of the Bible.

VI. Through the liberality of William A. Ingham, Esq., of Cleveland, Ohio, a course of lectures commenced during the year 1869, will be completed during the present year, by distinguished gentlemen, upon Natural and Revealed Religion.

RELIGIOUS INSTRUCTION.

MORNING worship is held in the College Chapel at the opening of the exercises, each day of the week except Sunday.

On Sabbath morning all the students are required to attend public worship at such Church as the Faculty understand to be preferred by the parents or guardians, and in the afternoon, at three o'clock, at the College Chapel.

A students' prayer meeting is held every Saturday night in one of the lecture rooms of the University; and, at nine o'clock on Sabbath morning, Bible classes are taught by members of the Faculty, which all have the privilege of attending.

MUSEUM.

THE Museum of the University comprises two distinct Cabinets:

THE PRESCOTT CABINET is devoted to the general department of Natural History. The basis of this collection was purchased from Dr. Prescott, of Concord, New Hampshire, in 1859; since which time, constant and valuable additions have been made.

The Zoological Department now contains 50 species of quadrupeds and quadrupeds: over 60 preparations in comparative and human anatomy; 230 specimens of birds, representing nearly two hundred distinct species; 102 specimens of reptiles, including 13 turtles, 38 leeches, 36 lizards, 15 batrachians; and 43 specimens of fishes; 500 insects, 53 crabs and lobsters, in articulates; and 50 species of corals, and 120 star-fishes, in radiates.

The section in Conchology consists of more than 5,000 shells, embracing 600 land shells, 700 fluviatile, and over 4,000 marine shells. Among the latter are included 355 species of marine shells deposited by the Smithsonian Institute.

The Mineralogical Department contains 4,200 distinct entries, arranged in the natural order illustrated in Dana's System of Mineralogy.

This Cabinet also contains 216 species of woods, and 259 species of grasses, all native to the State of Ohio. These are the contribution

of the Rev. Charles H. Warren, M. A., of the Ohio Conference, by whom they were collected and labeled.

During the past winter, a set of the valuable casts prepared by Prof. Ward, of Rochester, N. Y., has been purchased and put in position. This collection includes all such specimens as best represent the chief characteristics of each geological formation. Among the more prominent of these are the following: the *Megatherium Cuvieri*, from Buenos Ayres, South America; a giant sloth, seven feet in height and seventeen and one-half feet in length; the *Plesiosaurus Cramptoni*, a gigantic reptile found near Whitby, England, its length being twenty-three feet, and its breadth twelve feet; the skull and tusks of the *Elephas Ganesa*, discovered in a miocene deposit of the Sewalik Hills of India, the latter of which are ten and one-half feet in length, and twenty-six inches in circumference at the base; heads of the *Dinotherium giganteum*, and of the *Mastodon giganteus*; the *Glyptodon reticulatus*, from Montevideo, South America, an enormous fossil edentate representative of the Armadillos, whose length is eleven feet, and the weight of whose armor is supposed to have been more than four thousand pounds; and the *Colossochelys atlas*, a huge tortoise eight feet and two inches in length, and five feet ten inches in width.

THE MANN CABINET is devoted to the collection and exhibition of minerals and fossils illustrative of the several geologic ages. The room is also used as the recitation-room for Geology. The foundation is the gift of the late R. P. Mann, M. D., of Milford, Ohio. The collection consists of several thousand specimens arranged in geologic order, and it is especially rich in fossils belonging to the corniferous limestone, the great feature of which is the numerous specimens of fossil fish, comprising jaws, heads, spines, scales, &c. Here is to be seen a fossil tree, supposed to be the oldest specimen in the world. This Cabinet also contains 200 specimens of different rock, illustrative of the Geology of Ohio, collected by Prof. W. W. Mather, during the first Geologic Survey.

A department of archæology and ethnology has been opened, in which are already collected a large number of Indian remains and relics, together with a quantity of war relics, ancient documents, a cast of the celebrated Rosetta stone, &c. All specimens of this character, from whatever locality, will be gratefully received, and will be labeled with the name of the donor.

The Arboretum, a collection commenced on the College grounds some years since by Rev. Joseph H. Creighton, M. A., of the Ohio Conference, now embraces over six hundred kinds, and is designed to include every tree, native and foreign, that will grow in this latitude.

LIBRARY.

The Sturges Library now contains.....9,350 Vols.
 The Ohio Methodist Historical Society Library contains... 136 "
 The Society Libraries contain.....3,500 "

Valuable additions are annually made to the University Library, especially through the liberal donations of Rev. Joseph M. Trimble, D. D., of Columbus, and William A. Ingham, Esq., of Cleveland, to their respective alcoves.

During the present year, the valuable library bequeathed by the late Rev. Charles Elliott, D. D., has, by the liberality of his family, been added to the University Library.

GOVERNMENT.

A DAILY account is kept of each student, in such a way as to afford a full exhibit of his habits in regard to regularity and punctuality in his duties, as well as the merit of his recitations in his several studies. This exhibit is read publicly at the close of the term, and a copy sent, when desired, to the parents or guardians of each student.

EXAMINATIONS.

THERE is an examination of all the classes at the close of the first two terms before a committee of the Faculty, and at the close of the year before a committee of the Patronizing Conferences. The examinations are intended to be thorough and impartial, and go far toward determining the standing of the student.

GRADUATION.

Degrees in the Arts are conferred *in cursu* only on those who go through the entire Classical Course. The degree of Bachelor of Science is conferred on those who complete the Scientific Course of Study.

Bachelors of Arts of three or more years' standing, who have maintained a good moral character, are eligible to the degree of Master of Arts *in cursu* on payment, in advance, of the usual fee of five dollars. Application must be made to the Secretary three weeks before Commencement.

EXPENSES AND PAYMENTS.

Scholarships, admitting the student to all the studies required for graduation, can be purchased at the University at about six dollars a year.

Modern Languages, each, \$3 per session\$9 00

Incidental expenses, \$3 per session,..... 9 00

The above charges are payable by the Session *in advance*.

Boarding in private families at from \$3.50 to \$4.50 per week.

Students can board themselves at from \$1.50 to \$2.50 per week.

Room-rent in Morris Hall, \$2.50 per session.

In private families, rooms ready furnished, \$1 per week.

The regular text-books can be had in the place.

Parents and guardians are earnestly advised that young men at college have little need of pocket-money; and in all cases a detailed account of expenditures should be required. It is safer that their funds be intrusted to one of the Professors, whose discretion may regulate their expenditures.

SCHOOL-TEACHING.

CONTINUED residence during term-time is desirable; but students whose circumstances require it, may, at the discretion of the Faculty, be absent a limited time, for the purpose of teaching school.

TERMS AND VACATIONS.

THE Collegiate Year is divided into three sessions and three vacations.

THE COMMENCEMENT DAY is the last Thursday in June.

The First Session commences the third Thursday of September, and continues till the Wednesday preceding Christmas.

The Second Session commences two weeks after the close of the first session, and continues twelve weeks.

The Third Session commences one week after the close of the second session, and continues till Commencement Day.

CALENDAR FOR 1870-71.

1870. Thursday, September 15th, First Term begins.

1870. Wednesday, December 21st, First Term ends.

Vacation two weeks.

1871. Thursday, January 5th, Second Term begins.

1871. Wednesday, March 29th, Second Term ends.

Vacation one week.

1871. Thursday, April 6th, Third Term begins.

1871. Thursday, June 29th, Commencement.
